ABOUT ME

In my first professional experience in the job market, I worked as an apprentice buyer at Hospital Santa Marta, learning about logistical routines and about the process flows aimed at hospital IT systems.

I started my journey as a programmer in 2017 at the University of Brasília. After that, I joined the area of user support and maintenance of the IT environment at UNB - Campus Ceilândia, as a technical intern in information technology.

In 2019, I received a proposal from Stefanini IT Solutions to work in the Quality and Assurance (QA) area, as a Jr. Quality Analyst. In this first experience as a full-time employee. I learned in practice how corporate environments work and had significant learning in what it concerns the procedural flows of the service desk call centers.

Passionate about programming, I went back to studying development at IESB college, specializing in the areas of Software Engineering, Data Science and Data Engineering. Currently as a JavaScript developer at Cartório Colorado, I seek to apply the methodologies and best practices acquired throughout my career in my projects, always seeking personal and technical development, learning more every day to become the best version of myself!

EXPERIENCE

CARTÓRIO COLORADO

Brasília, Distrito Federal

OCT 2021 - PRESENT

JAVASCRIPT BACKEND DEVELOPER

Trainee

I work in the development of notary's office applications using Stack: RocketChat apps-engine, state machines with Xstate, JavaScript + NodeJS, model-based tests with Jest, mongoDB, code versioning on Github, microservices with docker + kubernetes and GKE. We use the Google cloud as infrastructure and work on backend application development with NodeJS, we perform model-based tests with Jest, state machines with Xstate, devOps with kubernetes and CI/CD with Github actions.

EBSERH

Brasília, Distrito Federal

NOV 2020 - OCT 2021

INFRASTRUCTURE TECHNICIAN

Intern

I worked in the IT governance area, participating in large projects of inventory mapping, infrastructure analytics dashboards, infrastructure support and customer service, mind maps with miMind, IT inventory visualization with Power BI, visual design of organizational architecture of IT with Figma and monitoring of availability indicators with Zabbix.

STEFANINI IT SOLUTIONS

Brasília, Distrito Federal

JUL 2019 - NOV 2020

JR QUALITY ANALYST (QA)

Full-time

I worked in the Quality and Assurance area focused on routine monitoring in the Service Desk environment. Conducting monitoring, feedback, calibrations, TOC's (Total Quality Control) working in the area of people development and asset management, call management, compliance and monitoring the continuous improvement of contracts in which I worked.

UNB - CAMPUS CEILÂNDIA

Ceilândia, Distrito Federal

AUG 2018 - JUL 2019

IT TECHNICAL SUPPORT

Intern

Expertise in technical support, user support, computer network configuration, hardware maintenance, computer lab maintenance, cabling structure maintenance, Cloud Computing and other IT services in general.

HOSPITAL SANTA MARTA

Taguatinga Sul, Distrito Federal

DEC 2016 - AUG 2018

PURCHASING APPRENTICE

Apprentice

I worked in the purchasing and quality sector, performing the work of raising product inventory reports and purchase orders, investigating the history of mandatory quality certifications of supplier companies, helping with the planning of input demand, organizing documents, in the feedbacks to suppliers and control action plans for atypical features found in purchased services or products.
